

Highlights of IMOLD V11

IMOLD® for SolidWorks

CommandManager

IMOLD V11 incorporates context-sensitive toolbar that dynamically updates based on the toolbar you want to access. To toggle the descriptions and size of the buttons, right-click in the CommandManager and select or clear Use Large Buttons with Text.

IMOLD Simulate

Perform entire mold opening simulation with just a click of a button. Watch the sliders, lifters and ejectors move according to stroke.

Moldbase and Components

More 3-Plate and Pin-Point Gate moldbase system added.

MBC

Ability to add ejectors using IMOLD on moldbases customized in MBC.

Thread Repair

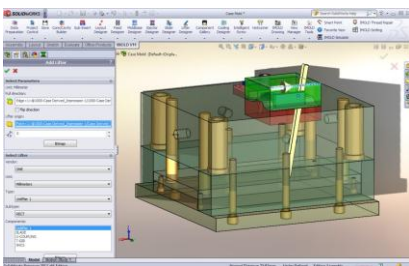

Perform engineering changes to moldbase size and have the option to automatically repair thread holes.

Core/Cavity Builder

A faster surface copy for parts with surfaces > 500.

Other Enhancements

Optimize – assign patch faces.

License Registration Manager

New integrated licensing system for all packages
